github.com/akashp2002

Summary

MCA graduate specializing in Generative AI and Agentic AI, with hands-on experience building production-ready AI systems using LangGraph, RAG, Model Context Protocol (MCP), LLMs, FastAPI, and AWS. Experienced in designing multi-agent workflows, stateful AI applications, and intelligent retrieval pipelines with persistent checkpointing. Strong foundation in Java, Python and full-stack development, with a passion for building scalable, real-world AI applications.

Education

Tkm College of Engineering Master of Computer Application	2024 – 2026
Morazha Co-Operative Arts and Science College Bachelor of Computer Application	2019 – 2022

Projects

- Multi-Agent AI Job Matching Platform** https://github.com/akashp2002/careerpilot_ai
- Built a LangGraph multi-agent job-matching platform with MCP-based job retrieval, JD analysis, semantic matching, ranking, explanations, and human-in-the-loop refinement.
 - Developed a FastAPI and React resume intelligence pipeline using Groq gpt-oss-20b, Gemini fallback, LangSmith tracing, and PostgreSQL persistence.
 - Productionized the platform with JWT authentication, API rate limiting, prompt-injection guardrails, Upstash Redis caching, and SSE streaming.
 - Deployed the application on AWS EC2 with Nginx and Amazon RDS PostgreSQL; configured GitHub Actions CI for automated testing and health checks.
- Cloudflare Incident RAG System** <https://github.com/akashp2002/CloudflareAssistant>
- Built a full-stack RAG system (FastAPI, React, LlamaIndex, Qdrant, Groq, Docker) to answer questions from Cloudflare incident postmortems.
 - Implemented hybrid retrieval combining dense vector search and BM25 via Reciprocal Rank Fusion, followed by cross-encoder reranking for improved relevance.
 - Built grounded answer generation with source citations and explicit refusal on insufficient context, and evaluated retrieval quality using Ragas.

Skills

Frontend: React.js, HTML, CSS
Backend: Node.js, Express.js, FastAPI, REST APIs
Programming Languages: Java, Python, SQL
Database: MongoDB, MySQL, PostgreSQL, Qdrant (Vector DB)
AI/GenAI: RAG, LlamaIndex, LangGraph, MCP, Groq API, Prompt Engineering, Transformers
Cloud/Tools: AWS (EC2, RDS), Docker, Git, GitHub Actions, LangSmith, Ragas

Certificates

Data Structures and Algorithms Design – NPTEL–IIT Kanpur	2025
MERN Stack Development	2022–2023
Deep Learning – DeepLearning.AI (Coursera)	2026
